

## D.T2.2.1 Development of Informative Destination System (IDS)

## Mock-Up Screens of the IDS

<b>CONTRACT:</b>	«Provision of support services to the Municipality of Molfetta in the context of the implementation of the project "Nautical Tourism Development and Promotion of Regional Ports " with acronym "REGLPORTS", which is funded by the transnational cooperation Programme "Interreg IPA CBC Italy–Albania–Montenegro Programme" of the 2014-2020 Program Period»
<b>ACTIVITY:</b>	A.T2.2 "Informative Destination System (IDS)"
<b>DELIVERABLE:</b>	D.T2.2.1 "Development of Informative Destination System (IDS)"
<b>SUB-DELIVERABLE:</b>	D.T2.2.1.1 "Mock-Up"
<b>DATE:</b>	30/11/2020

We attach screenshots from the mock-up screens of the IDS (Informative Destination System), as was designed by OMNI.CO S.R.L.

The IDS was designed to have an intuitive UI (User Interface) in order to assist every category of users, from starters all the way to experienced ones.

The home page of the IDS is depicted below and will be explained in the following paragraphs.

Starting from the top-left of the screen, the first element of the page is the REGLPORTS logo, according to the regulations of the EU.

After the logo is the main menu of the IDS home page, consisting of the Home button, the Search button and the Ports & Marinas button.

The Home button will always redirect the user back the IDS home page, as seen above. The Search button allows the user to perform a search for ports and marinas.

The Ports & Marinas button will allow the user to select the desired port or marina from a list, as seen below.

Should the user click on a Port or Marina, the IDS will display the relevant information, as seen on the following screenshot.

As seen on the forementioned screenshot, the user can view information about the selection, such as:

- The name of the Port/Marina.
- The Location of the Port/Marina.
- Relevant pictures.
- Data about the Port/Marina that will interest the user in choosing the best

possible solution.

- Phone number of the Port/Marina.
- Email of the Port/Marina.
- Should the Port/Marina provide an online tracking system, the user will be able to check for availability for the selected days, through the IDS.
- The user will be able to share or save the selected Port/Marina.

If the user desires to perform a search for a Port/Marina that will suit the user's needs, the IDS will provide a few filters to be filled with according information, such as:

- Carrying Capacity.
- Harbor Size.
- Mooring Area.
- Harbor Type.
- Facilities.
- Mooring Positions.

The user will be also able to search for Ports/Marinas with booking or not with booking availability.

These filters are located on the left sidebar of the IDS and are depicted on the following screenshot.

**All** With Booking No Booking

**Carrying Capacity**

Min Max

**Harbor Size**
